SUMMARY

Adaptable software engineer with 4+ years of experience designing and building production-grade, cross-platform mobile and web applications across diverse industries and business domains. Skilled in Flutter and Dart, with strong fundamentals in clean architecture, state management (BLoC, GetX, Riverpod, Provider), RESTful APIs, real-time communication, and third-party system integrations. Complemented by over a year of hands-on experience in data analytics using SQL, Power BI, and Python. A fast learner who adapts quickly to new business domains, tools, and technologies to deliver reliable, scalable software.

SKILLS

Mobile Development:

Flutter (iOS & Android), Dart, State Management (BLoC, GetX, Riverpod, Provider), Clean Architecture, REST APIs, WebSockets, Google Maps API & Geolocation, Firebase, Local Storage, Responsive UI & Widget Trees, HTML, CSS, JavaScript

Data Analytics (1+ year hands-on experience):

SQL, MySQL, Python, Power BI, DAX, Excel, Power Query, Pivot Tables, Data Visualization, KPI Reporting

Tools & Workflow:

Git (version control)

WORK EXPERIENCE

Mobile App Developer — Jeeb

Apr 2026 – Present | Real-time delivery ecosystem — Customer, Merchant & Driver apps

- Built a live location tracking system for deliveries with Google Maps navigation and routing
- Implemented WebSockets for real-time communication across all three apps
- Designed a scalable multi-app architecture optimized for heavy real-time data

Tech Stack: Flutter, Dart, GetX, Clean Architecture, REST APIs, WebSockets, Google Maps API

Freelance Flutter Developer — Boxit Ecosystem

Aug 2025 – Present | Production multi-role delivery & marketplace system

- Shipped new features and fixed bugs across Customer, Merchant & Driver apps
- Managed complex API integrations and refactored architecture for scalability
- Supported live production deployments

Tech Stack: Flutter, GetX, Clean Architecture, REST APIs, Firebase

Freelance Flutter Developer — Dakesh

Feb 2026 – May 2026 | Real-time barter marketplace platform

- Built a real-time chat system with WebSockets for instant updates
- Developed the marketplace UI and managed state and API layers
- Designed a scalable architecture for a peer-to-peer platform

Tech Stack: Flutter, Dart, GetX, WebSockets, REST APIs

Mobile App Developer — eSimly Ltd

Sep 2024 – Aug 2025 | eSIM management application

- Built authentication, user system, and payment gateway integration
- Managed the full app lifecycle and production deployment
- Fixed production issues and released updates on the App Store and Play Store

Tech Stack: Flutter, BLoC, REST APIs, Firebase, Payments

Freelance Flutter Developer — Al-Arqam Campaign

Feb 2025 – Jun 2025 | Hajj & Umrah guidance application

- Integrated Google Maps
- Added prayer tools and guidance features
- Optimized low-connectivity performance

Tech Stack: Flutter, GetX, Google Maps API, Local Storage

Mobile App Developer — YES For Online Services

Aug 2023 – Sep 2024 | Local services directory platform

- Integrated REST APIs and built Firebase push notifications
- Designed a responsive UI and maintained production stability
- Collaborated closely with the backend team

Tech Stack: Flutter, Firebase, REST APIs

PROJECTS

Flutter Development

eSimly — eSIM Management System — Secure eSIM management platform with authentication, payment gateway integration, and real-time account updates. Live on the App Store and Google Play.

Tech Stack: Flutter, BLoC, Firebase, Payment Gateway

DRW Kitchen — Food Delivery Application — Built and deployed a food delivery app for Android and iOS in three days using Flutter, Clean Architecture, and BLoC state management. Features include category-based meal browsing, customizable meal add-ons, and a real-time shopping cart. Live on the App Store and Google Play.

Tech Stack: Flutter, Dart, Clean Architecture, BLoC

IDBOOK — Local Services Directory App — Services marketplace app with REST API integration, push notifications, and a fully responsive UI across devices.

Tech Stack: Flutter, REST APIs, Firebase

Al-Arqam — Hajj & Umrah Guidance App — Religious guidance app featuring a Qibla compass and Google Maps integration, live on the App Store and Google Play.

Tech Stack: Flutter, GetX, Google Maps API, Local Storage

Dakesh — Real-Time Barter Marketplace — Peer-to-peer marketplace with real-time chat and instant messaging via WebSockets, plus a scalable marketplace UI.

Tech Stack: Flutter, GetX, WebSockets, REST APIs

Boxit Ecosystem — Multi-Role Delivery Platform — Contributed to production Customer, Merchant & Driver apps; feature development, bug fixes, and performance improvements in a live system.

Tech Stack: Flutter, GetX, Clean Architecture, Firebase

Portfolio Website — Personal Web Portfolio — Responsive Flutter Web portfolio with animations and a modern UI, deployed on GitHub Pages.

Tech Stack: Flutter Web, GitHub Pages

Scoopfolio — Ice Cream Shop Web Application — Web and desktop presence for an ice cream shop, including a flavor menu, shop locator, and brand overview page. Responsive layouts across mobile, tablet, and desktop, with BLoC state management. Connected to a Supabase backend so flavor and shop data can be updated without shipping a new build.

Tech Stack: Flutter Web, Supabase, BLoC, Responsive Design

BusApp — Intercity Bus Booking App (UI Prototype) — Cross-platform app for booking and managing intercity bus trips across Syria's governorates, with a feature-first architecture. Includes company/city selection, interactive seat selection, and payment confirmation with local payment methods (Sham Cash, Bank Al Baraka). Full Arabic and RTL support. Built approximately one year ago; UI is complete and the project is currently on hold, planned for backend development at a later stage.

Tech Stack: Flutter, BLoC, get_it, flutter_screenutil, RTL/Arabic Localization

Data & Analytics Projects (Self-Directed)

Personal projects built on my own initiative to apply real-world data analyst workflows — not commercial or client work.

Pharmacy Sales & Performance Dashboard — An Excel-only analytics build: cleaned messy pharmacy sales data (mismatched codes, text dates, duplicates) and built a full analytics workflow with Power Query, XLOOKUP, Power Pivot, DAX measures, and an interactive PivotTable dashboard with slicers.

Tools: Excel, Power Query, XLOOKUP, Power Pivot, DAX, PivotTables

Customer Behavior Analytics Dashboard — Explored customer shopping behavior end to end — SQL views to answer business questions, Python for data exploration, DAX measures and KPIs, shipped as an interactive Power BI dashboard.

Tools: SQL, MySQL, Python, Power BI, DAX

SkinCare Sales Analytics Dashboard — End-to-end analysis of skincare e-commerce sales — data cleaning and validation in SQL/MySQL, then KPI development and visualization in Power BI.

Tools: Power BI, SQL, MySQL, Excel, DAX

Internet Sales Dashboard — Daily internet sales performance by customer and product, with sales-vs-budget tracking and drill-down filters, built from real sales-manager user stories.

Tools: SQL, Power BI, Excel

Customers Dashboard — Companion dashboard focused on customer purchasing behavior, top customers, and potential leads, with daily-refresh KPIs.

Tools: SQL, Power BI, Excel

Coffee Dashboard — Sales Analytics — Analyzed revenue trends by year, city, month, and product category to identify profit and sales patterns.

Tools: Excel, Data Transformation, Pivot Tables

Disney Dashboard — Entertainment Analytics — Interactive dashboard analyzing shows by year, country, and type; used DAX for director insights and runtime analysis.

Tools: Power BI, DAX

EDUCATION

Bachelor's Degree in Informatics Engineering

Homs University | Homs, Syria | Aug 2018 – May 2023

- GPA: 86% (Graduated with Honors)
- Focus: Software Engineering, Database Management, Algorithms, and System Architecture

KEY ACHIEVEMENTS

- **Top National Exam Performer** — 1st place in Syria, Unified National Software Exam (2023)
- **Academic Excellence** — Ranked 7th (2nd year) and 4th (final year) in Informatics Engineering
- **National Programming Finalist** — Ranked 5th and 8th in university programming contests

SOFT SKILLS & LANGUAGES

Soft Skills: Complex Problem-Solving, Fast Learning, Cross-Functional Team Collaboration, Remote Time Management.

Languages: Arabic (Native), English (Professional Working Proficiency).
